

Skid carrier

A robust, payload-optimised trailer for transporting roller containers in accordance with DIN 30722.

Container transport

Skid Carrier

The trailer for roller container transport, from the Hüffermann modular system, excels in every sphere.

The skid carrier is a robust, payload-optimised trailer for transporting roller containers in accordance with DIN 30722. Hüffermann, with its modular component system, provides the right solution for every application, whether that's for container service or in long-distance transport.

Skid carrier modular system

The Hüffermann modular construction offers two key advantages: individual design, which is tailored exactly to your requirements and high-quality production – 100% “Made in Germany” guaranteed. Hüffer-

mann only uses first-class vehicle components from renowned manufacturers, so their durability pays off over the course of their service life. Why not contact us? We'd love to help you.

Skid carrier versions

The right solution for every application

Your benefits

- + Robust construction
- + Chassis for high payload focal points
- + Individual trailer configuration

Chassis design

The longitudinal girder construction throughout with optimised material strength ensures smooth container transport. The container is placed on the skid with the removable device and rolled over the chassis. Containers with defective rollers and different container lengths or waste compactors with additional rollers are no problem for the skid trailer.

Hüffermann designed the trailer hook of the skid trailer in such a way that the skid lies

in an inclined position over the container reserves, simplifying the setting process.

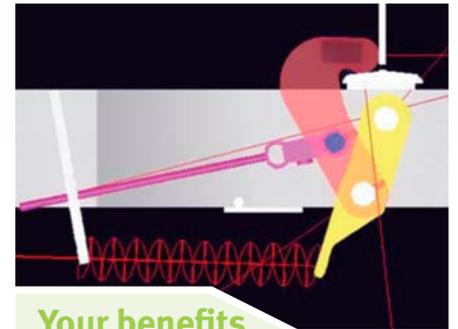

Your benefits

- + Durable
- + Reduced wear to rolling surfaces
- + Safety when settling the container
- + Extremely robust

Load securing system

A patented and certified, low-noise, pneumatic 4-compartment container locking, featuring a very low-maintenance and easy-to-repair design offers lasting, reliable cargo loading.

Your benefits

- + Durable
- + Low noise pollution
- + Low maintenance costs
- + Reliable securing of loads
- + Extremely robust
- + Many years of practical experience

blue line product line

The blue line product line is a technically balanced trailer concept that is specially designed for the transportation of roller containers.

"blue Line" edition skid carrier

blue line skid carriers

- With a proven design:
Type: HSA 1870 / HSA 1865
- Chassis: SAF Intradisc
- Axle load: 9 t
- Tyres: 265/70R19.5 – 8 wheels
- Tyres: 385/55R22.5 – 4 wheels
- Knorr or Wabco brake system
- Storage compartment
- Rear apron
- Hella part LED lighting

Options:

- A-sign or GGVS (German Ordinance on Road Transport of Hazardous Materials)
- Reversing light
- Spare wheel
- Arc galvanising
- Rear space monitoring system
- elegance edition

MARATHON – pure Hüffermann quality

The Marathon product line is a payload-optimised container transport concept and is therefore particularly suitable for long-distance transport under extreme operating conditions. Growing market requirements

in the recycling loop as well as ever greater distances between the recycling and recovery facilities increasingly demand payload-optimised and versatile roller container vehicles.

Marathon: Durable and retains value

Hüffermann designers focus on the payload, durability and value stability. Hüffermann delivers the Marathon product line with disc-braked 9-ton chassis with twin or single tyres.

Your benefits

- + Robust construction
- + High payload
- + Retains value
- + Especially for long-distance transport

elegance edition – pure Hüffermann quality

Hüffermann always provides proven quality, due to the high demands placed on each individual production step.

elegance edition: Durable and retains value

The skid carrier can be supplied as either a two-axle or three-axle version, with an air-sprung, disc-braked chassis in the elegance edition.

Your benefits

- + Fine design
- + Compact equipment package
- + Retains value
- + Durable

Skid carrier silo design

The modular design from Hüffermann offers you two important advantages: individual configuration with high-quality materials

and vehicle assemblies. The result is durable products with exceptional quality, combining functionality and optimum design.

HSA1870-265-round silo equipment

Skid carrier with central axis design

A chassis can be selected for container lengths from 6000 mm – 7700 mm with 19.5" twin or 22.5" single tyres.
